# Solving for success: How to improve math instruction in Arkansas

Math matters. Higher math scores for elementary-age students translate to higher earnings as adults.[1] In fact, math scores predict future earnings better than reading scores. Early math skills are also a strong predictor of success in other subjects, like reading and science, and even predict grade retention from kindergarten through eighth grade.[2] Math skills are in high demand in the labor market. Among the fastest growing jobs are those that require quantitative skills.[3] Despite this evidence for how much math matters, state policy and support for strengthening math instruction severely lags nationwide.

To improve math instruction, we must bolster the capacity of **teachers**, especially before they enter classrooms. The solution starts with strong state policy.

The stakes for students in Arkansas

In Arkansas, 30% of 4th grade lack basic math knowledge and skills based on the most recent National Assessment of Education Progress (NAEP). That percentage is even higher for some of Arkansas's historically underserved students. This means an estimated 10,751 students in 4th grade likely cannot perform skills like adding and subtracting multidigit whole numbers, fractions, and decimals.

2024 NAEP Arkansas Grade 4 Math Results

■ Below Basic ■ Basic ■ Proficient ■ Advanced

| 30% | 39% | 26% | 6% |
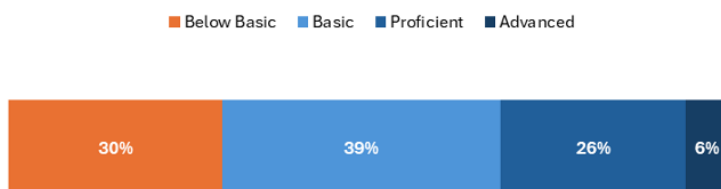

Mathematics knowledge is highly cumulative in nature, meaning that students who struggle to learn foundational math concepts are likely to continue to struggle well into middle and high school.[4] **A student who struggles in math early on may never catch up.**

Arkansas's performance on state policies to improve math instruction

NCTQ's *State of the States: Five Policy Levers to Improve Math Instruction* report provides a framework of actions state policymakers can take to ensure their teacher workforce can implement rigorous standards-aligned math instruction. States fall into one of four categories based on how extensively they have utilized five key policy levers at every stage of a teacher's career—from preparation to the classroom. Arkansas earned a **Moderate rating**, meaning the state has some policies in place across the five policy levers, but there is more to do.

Arkansas Rating:

Moderate

Strong   Moderate   Weak   Unacceptable
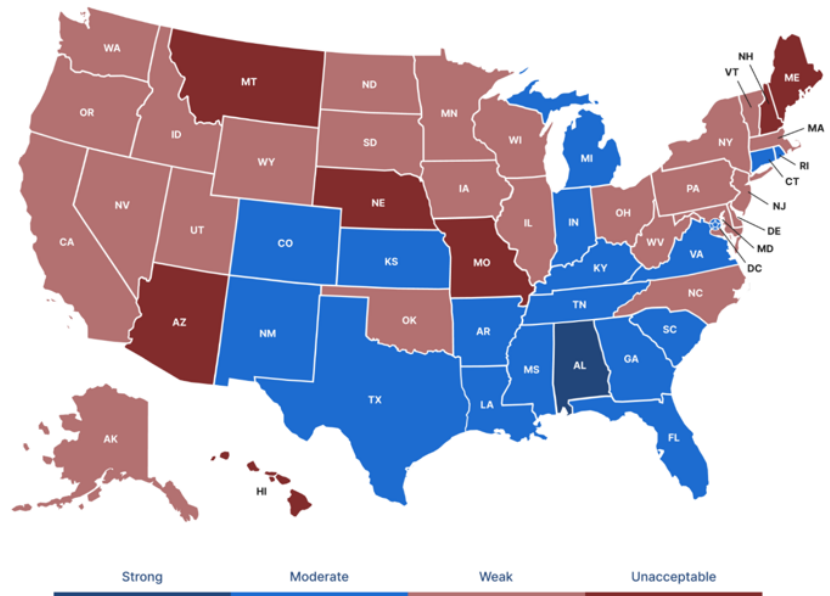

Policy actions are weighted equally. The chart below shows how Arkansas performs across the five policy levers.

How is Arkansas performing on the five state policy levers?

Arkansas ranks **slightly above** the national average.

1	Sets specific, detailed math standards for teacher preparation programs	**Strong**
2	Reviews teacher preparation programs to ensure they are providing strong math instruction	**Moderate**
3	Adopts a strong elementary math licensure test	**Strong**
4	Requires districts to select high-quality math curricula and supports skillful implementation	**Moderate**
5	Provides professional learning and ongoing support for teachers to sustain effective math instruction	**Moderate**

National Council
on Teacher Quality

How does Arkansas perform on each of the actions?

To determine the ratings above, NCTQ identified 16 key actions within the five policy levers and analyzed the extent to which states are implementing them. The actions represent policies and practices states should employ to support the implementation of rigorous, high-quality math instruction across the teacher development continuum. This chart outlines Arkansas's performance across all actions.

✔ Yes   ○ Partially   ✖ No

Teacher prep standards	Does the state have math standards for elementary teacher prep programs that cover all four key math content topics (numbers & operations, algebraic thinking, geometry & measurement, data analysis & probability)?	✔
	Does the state require elementary programs to address math-specific pedagogy?	✔
Prep program approval	Does the state require the review of syllabi and/or coursework for math courses to determine the integration of math standards as part of the program review process?	✔
	Does the state require the inclusion of math experts in the review of teacher prep programs?	✔
	Does the state use math licensure test pass rate data as part of the program review process?	✔
	Does the state maintain full authority over prep program reviews and not permit outside entities to make the final decision on program renewal?	✖
Licensure test	Does the state use at least an acceptable math licensure test for elementary teacher candidates?	✔
	Does the state require all elementary candidates to pass a math licensure test?	✔
	Does the state publish math licensure pass rate data?	✖

✔ Yes   ◯ Partially   ✖ No

High-quality curriculum	Does the state require districts to adopt and implement high-quality math curricula?	◯
	Does the state provide guidance on how to select high-quality math curricula?	✔
	Does the state collect and publish data on the curricula districts are using?	✖
	Does the state require districts to post their math curricula on their websites?	✖
	Does the state allocate resources to help districts transition to and implement new curricula?	✔
Professional learning & coaching	Does the state financially support high-quality professional learning in mathematics instruction, especially in implementation of high-quality instructional materials?	✔
	Does the state provide financial support to districts for math coaches/specialists?	✖

Recommendations for Arkansas

Teacher prep standards:

- Encourage elementary teacher preparation programs to prioritize math courses designed for educators over traditional higher-level math requirements.

Prep program approval:

- Maintain full authority over prep programs and do not permit outside entities to make the final decision on program renewal.

Licensure tests:

- Publish first-time pass rate data by program on the math licensure test to determine which programs are preparing candidates well.

High-quality curricula:

- Require districts to adopt and implement high-quality math instructional materials.
- Collect and publish data on the curricula districts are using.
- Enact a policy that requires districts to publish the math curricula they are using to ensure transparency for parents and the school community.

Professional learning & coaching

- Provide districts with funds to support math coaches/specialists to improve instruction, and consider how the state can provide training and ongoing support for coaches to promote consistency in math instruction statewide.
- Conduct robust ongoing evaluation of professional learning.

The current teacher prep landscape in Arkansas

Elementary math teacher prep

Far too many elementary teacher prep programs fail to dedicate enough instructional time to building aspiring teachers' math knowledge—leaving teachers unprepared and students underserved. Put simply, teachers must deeply understand the math content they want students to learn and must have specialized knowledge about how to teach it (i.e., math pedagogy). This is why strong state policy related to teacher prep is so important.

In Arkansas, NCTQ evaluated 16 elementary prep programs to determine whether they dedicate enough time to key math content topics and pedagogy. The analysis shows Arkansas programs perform above the national average. (To learn more, see the *2025 Teacher Prep Review: Solving for Math Success* report.)

Only 6% of Arkansas programs earn an A or A+ by dedicating adequate instructional time to both math content and pedagogy
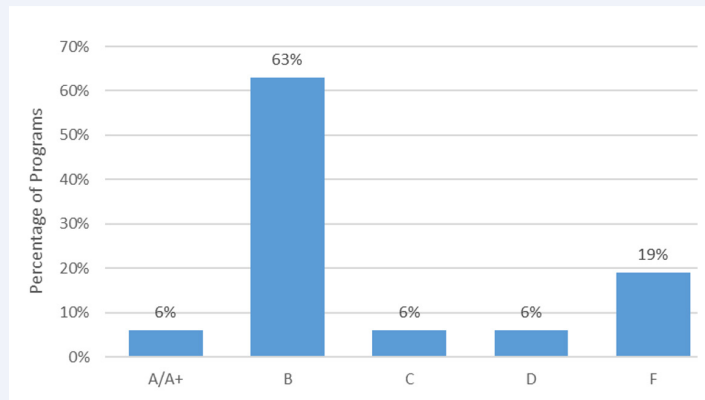

NCTQ looks for instructional hours dedicated to math pedagogy and four math content topics:

- *Numbers and Operations*
- *Algebraic Thinking*
- *Geometry and Measurement*
- *Data Analysis and Probability*

Grades are determined by the amount and distribution of instructional time

A+ Program requires at least 150 instructional hours across the five topics and 100% of the recommended target hours for each topic

A Program requires at least 135 instructional hours across the five topics and at least 90% of the recommended target hours for each topic

B Program requires at least 120 instructional hours (80%) across the five topics

C Program requires at least 105 instructional hours (70%) across the five topics

D Program requires at least 90 instructional hours (60%) across the five topics

F Program requires fewer than 90 instructional hours (<60%) across the five topics

Teacher Prep Program Grades in Arkansas

School	Program Level	Grade	Instructional Hour Targets for Math Content and Pedagogy			
			Numbers & Operations + Algebraic Thinking (combined)	Geometry & Measurement	Data Analysis & Probability	Math Pedagogy
Arkansas State University	UG	B	Fully Meets (94 hours)	Fully Meets (29 hours)	Does Not Meet (11 hours)	Does Not Meet (40 hours)
Arkansas Tech University	UG	B	Does Not Meet (47 hours)	Fully Meets (26 hours)	Fully Meets (17 hours)	Fully Meets (56 hours)
Harding University	UG	F	Does Not Meet (29 hours)	Fully Meets (69 hours)	Fully Meets (24 hours)	Does Not Meet (13 hours)
Harding University	G	F	Does Not Meet (36 hours)	Does Not Meet (16 hours)	Fully Meets (20 hours)	Does Not Meet (12 hours)

School	Program Level	Grade	Instructional Hour Targets for Math Content and Pedagogy			
			Numbers & Operations + Algebraic Thinking (combined)	Geometry & Measurement	Data Analysis & Probability	Math Pedagogy
Henderson State University	UG	B	Does Not Meet (45 hours)	Fully Meets (45 hours)	Fully Meets (45 hours)	Fully Meets (56 hours)
John Brown University	UG	D	Does Not Meet (39 hours)	Does Not Meet (7 hours)	Does Not Meet (7 hours)	Fully Meets (82 hours)
Ouachita Baptist University	UG	C	Does Not Meet (58 hours)	Does Not Meet (19 hours)	Fully Meets (26 hours)	Does Not Meet (19 hours)
Southern Arkansas University	UG	B	Does Not Meet (37 hours)	Fully Meets (29 hours)	Fully Meets (26 hours)	Fully Meets (56 hours)
University of Arkansas	UG	B	Does Not Meet (56 hours)	Approaches (24 hours)	Fully Meets (24 hours)	Approaches (43 hours)
University of Arkansas - Fort Smith	UG	A+	Fully Meets (65 hours)	Fully Meets (54 hours)	Fully Meets (28 hours)	Fully Meets (87 hours)
University of Arkansas at Little Rock	UG	B	Fully Meets (68 hours)	Fully Meets (45 hours)	Does Not Meet (8 hours)	Fully Meets (66 hours)
University of Arkansas at Monticello	UG	B	Does Not Meet (52 hours)	Fully Meets (45 hours)	Does Not Meet (0 hours)	Fully Meets (83 hours)
University of Arkansas at Pine Bluff	UG	B	Fully Meets (79 hours)	Does Not Meet (11 hours)	Does Not Meet (0 hours)	Fully Meets (45 hours)
University of Arkansas at Pine Bluff	G	B	Fully Meets (65 hours)	Does Not Meet (20 hours)	Fully Meets (15 hours)	Fully Meets (45 hours)
University of Central Arkansas	UG	B	Fully Meets (90 hours)	Approaches (23 hours)	Fully Meets (23 hours)	Does Not Meet (23 hours)
University of Central Arkansas	G	F	Does Not Meet (0 hours)	Does Not Meet (0 hours)	Does Not Meet (0 hours)	Does Not Meet (0 hours)

Questions? Contact Shannon Holston, Chief of Policy at sholston@nctq.org or Ron Noble, Chief of Teacher Prep at ron.noble@nctq.org.

Note: Programs that meet or exceed the instructional target earn a "Fully Meets." Programs that provide at least 90% of the instructional target earn an "Approaches. For more information about instructional hour targets, review NCTQ's methodology and scoring rubric here.
