

Region 13 Education Service Center: Educator Certification Program (ECP)

Austin, Texas

Secondary Preparation Program

Secondary preparation program structure:

Teacher candidate enrollment: **123** (2011-2012)

Teacher production: **123** (2011-2012)

(2013 Title II Reports)

Secondary Preparation Program Grade

C-

Score Breakdown

Alt Cert Std A: Selection Criteria

By employing sufficiently high but pragmatic admissions standards, the program is designed to attract talented individuals who otherwise would not choose to teach.

Selection criteria for admission into the program satisfy this standard. The mean grade point average of candidates is sufficiently high to demonstrate that candidates have the requisite academic talent, and the program concludes that coursework with a rigorous assessment comparable to an audition for the assessment of non-academic talents that are also important for teaching.

Alt Cert Std B: Subject Area Expertise

Before teacher candidates have full-fledged teaching responsibilities, the program ensures their content mastery in every subject for which they could be responsible for instruction.

Without a thorough grasp of the subject they will teach—typically acquired by majoring in an academic discipline—secondary teachers will be unable to provide the sophisticated level of instruction that their students need to progress. All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages that are used to justify preparation short-cuts. Alternative certification programs should make sure, by either reviewing transcripts or requiring that candidates pass rigorous assessments, that before secondary candidates enter the classroom as the teachers of record they know the subjects they will teach.

The program does not meet this standard because it allows teacher candidates to enter their classrooms as the teachers of record without the transcript review or testing that would ensure that the candidates have sufficient content mastery.

Alt Cert Std C: Supervised Practice

The program provides adequate supervised classroom instruction practice opportunities.

If a program relies on a combination of clinical practice prior to having the candidate enter the classroom as the teacher of record and continued training during the time the candidate is engaged in full-time, independent teaching, both should fulfill minimal requirements: The clinical practice should allow at least three weeks of full time instruction, several formal observations, and mentoring by a teacher who has been selected due to mentoring skills and demonstrated effectiveness as measured by student performance. After the candidate begins independent teaching, the program should provide additional frequent observations and mentor support.

The program partly satisfies the standard because while the program does not provide co-teaching, the combination of clinical practice before entering the classroom and support after entering the classroom provides

- *a total of seven observations with written feedback by program supervisors as well as by mentor teachers, two during only two weeks of clinical practice before entering the classroom and five afterwards; and*
- *the support during clinical practice of a teacher-colleague who is a capable mentor (or has had mentorship training), but who is not also required to be an effective instructor.*

Alt Cert Std D: Evidence of Effectiveness

NA

The program's graduates have a positive impact on student learning.

A score on this standard is not applicable because evaluation depends on reports on the relative effectiveness of the program's graduates from a teacher preparation student performance data model; either 1) the program's state does not publish any such report, 2) the state publishes such a report, but the results do not pertain specifically to only this secondary program, or 3) the state publishes such a report, but the results for this program are not consistent for two consecutive years.
