Region 7 Education Service Center: Teacher Preparation and Certification Program (TPCP)

Kilgore, Texas

Secondary Preparation Program

Secondary preparation program structure:

Before internship: 80 hours of coursework	Additional 190 hours of coursework
	Notable features of internship:
	Program supervisor conducts at least three 45-minute observations, with written feedback and a debriefing required.
30 hours of fieldwork	There is no evidence of a co-teaching arrangement, however the mentor must submit a 'first six weeks checklist,' which is a detailed checklist of supports offered by the mentor. The list includes: assist with lesson planning, grading system and establishing classroom rules, etc.
	Mentor teacher observes the candidate for 45 minutes once each month during the first six months, with a meeting beforehand to discuss focus and a meeting afterward for discussion
	School administrator also conducts periodic walk throughs

Teacher candidate enrollment: **101** (2011-2012) Teacher production: **50** (2011-2012) (2013 Title II Reports)

Secondary Preparation Program Grade

Score Breakdown

Alt Cert Std A: Selection Criteria

By employing sufficiently high but pragmatic admissions standards, the program is designed to attract talented individuals who otherwise would not choose to teach.

Selection criteria for admission into the program only partly satisfy this standard. The mean grade point average of candidates is sufficiently high to demonstrate that candidates have the requisite academic talent, but the program does not adequately assess non-academic requirements also important for teaching, because although the program may require an interview, it does not require an audition.

Alt Cert Std B: Subject Area Expertise

Before teacher candidates have full-fledged teaching responsibilities, the program ensures their content mastery in every subject for which they could be responsible for instruction.

 \bigcirc

Without a thorough grasp of the subject they will teach—typically acquired by majoring in an academic discipline—secondary school teachers will be unable to provide the sophisticated level of instruction that their students need to progress. All children deserve to have teachers who are well versed in each and every one of the subjects they teach, regardless of teacher shortages that may be used to justify preparation shortcuts. Alternative certification programs should make sure, by either reviewing transcripts or requiring that candidates pass rigorous assessments, that before secondary candidates enter the classroom as the teachers of record they know the subjects they will teach.

We have evaluated programs on this standard with an eye toward regulations in each state regarding the nature of multiple-subject certification and required content licensing tests. Because our evaluation parallels the evaluation conducted for secondary preparation in traditional teacher preparation programs, more information can be found in the scoring methodology for the comparable standard applied to such programs, Standard 8: High School Content.

The program does not meet this standard because although it reviews transcripts or requires content testing, it offers two or more multiple-subject certifications for which its review of the content preparation of candidates is not adequate to ensure that all teacher candidates have sufficient content knowledge in every subject they will be qualified to teach. The multiple-subject certifications are in the areas of:

- Science
- Social science

The program's review of the content preparation of candidates in one of more of these single-subject certifications is adequate:

English

2

- Mathematics
- Specific sciences (such as Biology or Chemistry)
- Specific social sciences (such as History or Government)

Alt Cert Std C: Supervised Practice

The program provides adequate supervised classroom instruction practice opportunities.

The fundamental premise of alternative certification is that full-time, independent teaching can serve as a clinical training ground for teacher candidates. To the extent that this is even possible, it requires a co-teaching arrangement with a highly qualified mentor teacher, or—barring that—as close to a co-teaching arrangement as can be offered through intense support and feedback from the alternative certification program. In the latter case, the program's support with five or more formal observations in the beginning months of teaching must be supplemented by the support of a school-based colleague who has been selected to be a mentor on the basis of demonstrated mentoring capabilities as well as effective instruction as measured by student performance.

The program partly satisfies the standard because although the candidate is provided with considerable mentor support, the candidate

- is not provided a true co-teaching arrangement;
- LEGEND:
 Meets standard;
 Nearly meets standard;
 Partly meets standard;
 Meets a small part of standard;
 NA Not applicable.

- is provided only three formal observations by a program supervisor in the first year, therefore fewer than five formal observations in the first three months of teaching; and
- is provided with the support of a teacher-colleague who is a capable mentor (or has had mentorship training), but who is not required to be an effective instructor.

Alt Cert Std D: Evidence of Effectiveness

The program's graduates have a positive impact on student learning.

A score on this standard is not applicable because evaluation depends on reports on the relative effectiveness of the program's graduates from a teacher preparation student performance data model; either 1) the program's state does not publish any such report, 2) the state publishes such a report, but the results do not pertain specifically to only this secondary program, or 3) the state publishes such a report, but the results for this program are not consistent for two consecutive years.
